MAINE

Occupational
Injury and Illness
Survey

1977

Introduction

The Occupational Safety and Health Act of 1970 charged the U.S. Department of Labor with the responsibility of establishing and enforcing safety standards and for developing and maintaining an effective program of collection, compilation, and analysis of occupational safety and health statistics. The Bureau of Labor Statistics was then assigned the responsibility for establishing a system for the recordkeeping and reporting of occupational injuries and illnesses.

The Maine Department of Manpower Affairs, Bureau of Labor, Research and Statistics Division, under a cooperative Federal/State grant program, collects, compiles and analyzes the injury and illness data for the State of Maine. Data are collected by use of a survey form mailed to a sample of employers selected by the Bureau of Labor Statistics.

Results

Of an estimated 28,314 recordable injuries and illnesses reported in Maine during 1977, 13,135 were lost workday cases accounting for 237,813 lost work days or approximately 951 employee-years of lost time. As shown in Text Table 1, the incidence rate* for the private sector was 10.4, meaning about one out of ten employees experienced a work-related injury or illness during the year. The overall rate has now remained steady for the past three years. However, the rate of lost workday cases was 4.8, up from a rate of 4.5 in 1976 indicating an increase in the frequency of the more serious injuries and illnesses.

*The incidence rate represents the number of injuries and/or illnesses or lost workdays per 100 full-time equivalent workers (200,000 man hours).

TEXT TABLE 1

Incidence Rates by Industry Division
Maine, 1977 - 1976

	Incidence Rates					
	Total Cases		Lost Workday Cases		Non-Fatal Cases w/o Lost Workdays	
	1977	1976	1977	1976	1977	1976
Private Sector, All Industries	10.4	10.4	4.8	4.5	5.6	5.9
Industry Division						
Construction	15.0	14.7	7.4	6.5	7.5	8.2
Manufacturing	15.2	15.6	7.0	6.6	8.2	9.0
Transportation & Public Utilities	8.1	8.3	4.8	5.2	3.3	3.2
Wholesale & Retail Trade	7.8	6.9	3.2	2.5	4.6	4.4
Finance, Insurance, Real Estate	1.8	2.3	1.0	1.8	0.8	0.6
Services	5.4	5.7	2.5	2.3	2.9	3.4

At the Division level, only Wholesale and Retail Trade shows a major increase in the Total Case rate. Most of the increase was caused by a large increase in the Lost Workday Case rate. Although the Total Case rate in Construction showed only a marginal increase, there was a major shift in the relationship of the rates for Lost Workday Cases and Non-Fatal Cases without Lost Workdays. The former having an increase of .9 to 7.4, the latter a .8 decrease to 8.2.

A more detailed analysis of the data indicates that eight out of the ten Major Industry Groups with the highest incidence rates were from the Construction and Manufacturing Divisions (Text Table 2). From Construction, two of the three subordinate Groups, Heavy Construction Contractors and Special Trade Contractors, were included. Food and Lumber and Wood continue to show the highest rates. Also included from Manufacturing were Machinery, Fabricated Metals, Rubber and Plastics, and Textiles. The Industry Groups from outside these two Divisions were Agricultural Production and Railroad Transportation.

TEXT TABLE 2

Incidence Rates by Selected Major Industry Groups
Maine, 1977 - 1976

Industry (SIC)	Incidence Rates: Total Cases 1977	Total Cases 1976	Lost Workday Cases 1977	Lost Workday Cases 1976	Non-Fatal Cases w/o Lost Workdays 1977	Non-Fatal Cases w/o Lost Workdays 1976
Food and Kindred Products (20)	27.1	24.5	11.3	10.1	15.8	14.4
Lumber and Wood Products (24)	26.6	25.6	14.6	13.2	12.0	12.4
Machinery, Except Electrical (35)	18.7	17.8	6.6	4.6	12.1	13.2
Fabricated Metal Products (34)	17.8	18.2	8.7	8.6	8.9	9.6
Agricultural Production (01-02)	17.8	-	8.4	-	9.4	-
Heavy Construction Contractors (16)	16.7	16.0	9.0	7.4	7.7	8.4
Special Trade Contractors (17)	15.1	11.6	7.1	4.8	8.0	6.9
Rubber and Misc. Plastics Products (30)	14.8	10.8	6.7	4.4	8.0	6.5
Railroad Transportation (40)	14.6	12.5	10.4	8.5	4.2	4.1
Textile Mill Products (22)	14.2	14.4	7.7	6.7	6.4	7.7

The relationship of the incidence rate of Lost Workday Cases to Non-Fatal Cases Without Lost Workdays shows the relative frequency of the more severe injuries and illnesses. The private sector incidence rate of 10.4 breaks down into two components, 4.8 for Lost Workday Cases and 5.6 for Non-Fatal Cases Without Lost Workdays, in other words, 54% of the recordable injuries and illnesses resulted in no lost days and 46% resulted in lost workdays.

The Lost Workday incidence rate gives us a statistic to measure the severity of injuries and illnesses, and in 1976 this rate was 87.7 lost workdays per 100 employee-years, an increase of over 10% from 79.2 in 1976 (Text Table 3).

The average lost workdays per case was 18 in 1977, the same as in 1976.

TEXT TABLE 3

Lost Workday Incidence Rates and Average
Lost Workdays per Lost Workday Case by
Industry Division
Maine, 1977 - 1976

	Lost Workday Incidence Rate		Average Lost Workdays per Case	
	1977	1976	1977	1976
Private Sector, All Industries	87.7	79.2	18	18
Industry Division				
Construction	157.4	105.4	21	16
Manufacturing	129.9	123.8	18	19
Transportation & Public Utilities	75.7	104.5	16	20
Wholesale & Retail Trade	47.2	35.4	15	14
Finance, Insurance, Real Estate	6.9	10.1	7	6
Services	51.7	44.2	21	19

At the Major Industry level, a list of the ten industries with the highest incidence rate of Lost Workdays in 1977 shows some minor changes from the list of Industries with the highest rate of total cases. General Building Contractors, Paper, and Transportation Equipment moved into the group, while Machinery, Fabricated Metals, and Rubber and Plastics dropped out (Text Table 4).

TEXT TABLE 4

Lost Workday Incidence Rates and Average
Lost Workdays per Lost Workday Case by
Selected Major Industry Groups
Maine 1977 - 1976

	Lost Workday Incidence Rate		Average Lost Workdays per Case	
Industry (SIC)	1977	1976	1977	1976
Lumber and Wood Products (24)	254.5	262.6	17	20
Agricultural Production (01-02)	185.4	-	22	-
Food and Kindred Products (20)	183.1	122.3	16	13
Special Trade Contractors (17)	162.3	82.8	23	18
Textile Mill Products (22)	156.9	129.7	20	20
General Building Contractors (15)	155.6	123.9	22	15
Heavy Construction Contractors (16)	148.1	124.0	16	17
Railroad Transportation (40)	145.6	137.4	14	16
Paper & Allied Products (26)	133.5	128.3	34	31
Transportation Equipment (37)	128.2	126.2	25	31

Comparison to National Data

As shown in Text Table 5, the National incidence rate for Total Recordable Cases was 9.0, comprised of rates of 3.7 for Lost Workday Cases and 5.3 for Non-Fatal Cases without Lost Workdays. The U.S. rate was significantly lower than the State-wide rate of 10.4. Most of this difference was in the rate for Lost Workday Cases (4.8 vs. 3.7).

TEXT TABLE 5

Incidence Rates by Industry Division
United States and Maine, 1977

	Incidence Rates					
	Total Cases		Lost Workday Cases		Non-Fatal Cases w/o Lost Workdays	
	U.S.	ME.	U.S.	ME.	U.S.	ME.
Private Sector, All Industries	9.0	10.4	3.7	4.8	5.3	5.6
Industry Division						
Agriculture, Forestry, Fishing	10.7	16.5	4.8	8.4	5.8	8.1
Construction	15.2	15.0	5.8	7.4	9.4	7.5
Manufacturing	12.6	15.2	4.9	7.0	7.7	8.2
Transportation & Public Utilities	9.5	8.1	5.2	4.8	4.2	3.3
Wholesale & Retail Trade	7.6	7.8	2.9	3.2	4.7	4.6
Finance, Insurance, Real Estate	1.9	1.8	0.8	1.0	1.1	0.8
Services	5.3	5.4	2.2	2.5	3.1	2.9

At the Industry Division level, the Agriculture, Forestry and Fishing, and Manufacturing Divisions were higher than the National rate for total cases. Transportation and Public Utilities was lower. There was no significant difference in the other Divisions. In every Division except Transportation and Public Utilities, the State rate for Lost Workday Cases was higher than the National rate. In some cases, the difference is marginal, but it is noticeable not only in the two Divisions with higher total case rates but also in Construction where the overall rate is virtually the same.

One possible explanation for this difference in rates could be major differences in the relative size of various high-risk industries. The Bureau of Labor Statistics has developed a methodology called the Standard Industrial Mix (SIM) which can be used to adjust rates based on National employment patterns*. Using this method to modify the Maine All Industry rate, there is a major decrease to 9.6 for Total Cases and a drop to 5.1 for Non-fatal Cases without Lost Workdays. Of more significance is the fact that the Maine SIM rate for Lost Workday Cases showed a minimal drop from 4.8 to 4.5.

This would seem to indicate that the relatively high level of employment in some of the high-risk industries is only partially responsible for the difference in rates between the U.S. and Maine.

Rates at the Major Industry level follow a pattern similar to the Industry Division level. That is, the Total Case rate is higher, most of the difference stemming from the rate for Lost Workday Cases (Text Table 6). Of the ten Major Industries with the highest Total Case rate, all but three have State rates higher than the U.S. rates. Three of the industries with the largest differences are major employers, Food and Kindred Products, Lumber and Wood Products, and Textile Mill Products. In only one industry is the rate for Lost Workday Cases less than the comparable U.S. rate. This follows the pattern seen in the Division level rates.

TEXT TABLE 6

Incidence Rates by Selected Major Industry Groups

TABLE 1

Incidence Rates of Recordable Occupational Injuries and Illnesses by Type and Industry, State of Maine 1977

1/ Industry division and group totals include data for industries not shown separately.

2/ Standard Industrial Classification Manual, 1972 Edition

3/ The incidence rates represent the number of illnesses or lost workdays per 100 full-time employees and were calculated

$$N/EH \times 200{,}000$$

Where: N = number of injuries or lost workdays
EH = total hours worked by all employees during calendar 1977
200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)

4/ Because of rounding, the sum of the rates for lost workday cases and non-fatal cases without lost workdays may not equal the total. In addition, the difference between the total and the sum of the components shown may not reflect the fatality rate.

NOTES: DASHES indicate no data reported
ASTERISKS indicate incidence rates less than .05 per 100 full-time workers
N.E.C. = not elsewhere classified.

TABLE 4

Number of Recordable Occupational Injuries and Illnesses by Type and Industry, State of Maine 1977

1/ Industry division and group totals include data for industries not shown separately.

2/ Standard Industrial Classification Manual, 1972 Edition.

3/ Includes fatalities, in addition to lost workday cases and non fatal cases without lost workdays.

NOTES: DASHES indicate no data reported
N. E. C. = not elsewhere classified.

Appendix A

Technical Notes

Appendix A

Technical Notes

Scope of Survey

The survey relates to employers in the following industries in the State of Maine: Agriculture, Forestry and Fishing*, SIC 01-09; Mining, SIC 10-14; Construction, SIC 15-17; Manufacturing, SIC 20-39; Transportation and Public Utilities, SIC 40-49; Wholesale Trade, SIC 50-51; Retail Trade, SIC 52-59; Finance, Insurance and Real Estate, SIC 60-67; and Services, SIC 70-89 (except SIC 88). All employees, e.g., part-time, full-time, casual, etc., in these industries are covered. Excluded were self-employed individuals; agricultural employers; domestic employers; and Federal, State, and Local government units.

Questionnaires were mailed to 3,710 sample units. A relatively small proportion of these were excluded because they were no longer in operation, were not within the scope of the survey, were included in the report for another location, received duplicate survey forms for the same location, or the survey form was not mailable because of an inadequate address. Original and follow-up mailings and telephone calls resulted in 3,071 usable questionnaires of a possible 3,282 for 93.6% usable response rate.

Estimating Procedures

Estimates of injury and illness data were obtained for each sampled industry by weighting the data of each reporting unit by the inverse of the sampling ratio for the cell in each industry employment size group (i.e., sampling cell). Each of these sampling cells was adjusted for nonresponse. The aggregate data for the industry were then adjusted for births in the industry by benchmarking, a form of ratio estimation.

*Employers with less than eleven employees in Agricultural Production (SIC 01-02) were excluded.

Industrial Classification

Reporting units are classified into industries on the basis of their principal product or activity determined by information entered in Section V (Nature of Business) of the survey questionnaire. For a reporting unit making more than one product or engaging in more than one activity, data for the unit are included in the industry indicated by the more important product or activity.

Standardized Industrial Mix

Because rates among industries vary, caution is necessary when making comparisons between incidence rates produced for different jurisdictions. In making such comparisons, one could derive the impression that a state with a concentration of employment in industries with high incidence rates has a poor record when compared with the national rates or rates from another state if they have a lower concentration of these industries.

To overcome this bias, estimates for each state can be recalculated to a common employment base using data from the level lower than the level being compared. For example, if the target was an adjusted All Industry rate, data from the Industry Division level would be used. This process is called the Standardized Industrial Mix (SIM).

The formula is shown below:

$$\frac{\sum X_i \quad Y_i}{\sum X_- \quad X_o} \qquad \text{where}$$

X_i = employment for i-th industry

Y_i = unadjusted incidence rates for the i-th industry

X_o = employment for industries absent from the State.

Appendix B

1977 OSHA No. 103

Survey Package

ANNUAL OCCUPATIONAL INJURIES AND ILLNESSES SURVEY

1977 OSHA No. 103 FORM

(covering calendar year 1977)

U. S. DEPARTMENT OF LABOR
Bureau of Labor Statistics
for the Occupational Safety
and Health Administration
Washington, D. C. 20212

OMB APPROVAL NO. 44-R1492
Approval Expires October 1978

THIS REPORT IS MANDATORY UNDER PUBLIC LAW 91-596 FAILURE TO REPORT CAN RESULT IN THE ISSUANCE OF CITATIONS AND ASSESSMENT OF PENALTIES.

READ INSTRUCTIONS BEFORE COMPLETING THIS FORM. Complete and return **only** THIS FORM within 3 weeks.

COMPLETE THIS REPORT WHETHER OR NOT THERE WERE ANY RECORDABLE OCCUPATIONAL INJURIES OR ILLNESSES.

THE INFORMATION COLLECTED ON THIS FORM BY THE BUREAU OF LABOR STATISTICS AND THE MAINE DEPARTMENT OF MANPOWER AFFAIRS, BUREAU OF LABOR, WILL BE USED ONLY FOR ADMINISTRATIVE AND STATISTICAL PURPOSES.

I. ESTABLISHMENTS INCLUDED IN THIS REPORT

This report should include only those establishments located in, or identified by, the Report Location or Identification which appears below your mailing address on this form. Enter the number of establishments (see definition on page 1) included in this report.

☐

II. ANNUAL AVERAGE EMPLOYMENT IN 1977

Enter the average number of employees during calendar year 1977. Include all classes of employees, including seasonal, temporary, part-time, etc. See instructions for examples of computing your average employment.

(Round to the nearest whole number)

☐

III. TOTAL HOURS WORKED IN 1977

Enter the total number of hours actually worked by all employees during 1977. DO NOT include any non-work time even though paid, such as vacations, sick leave, holidays, etc.

(Round to the nearest whole number)

☐

NOTE: IF EMPLOYEES WORKED LOW HOURS DURING 1977 DUE TO LAYOFFS, STRIKES, FIRES, ETC., EXPLAIN IN SECTION IX.

IV. SUPPORT ACTIVITIES PERFORMED FOR OTHER ESTABLISHMENTS OF YOUR COMPANY

Does this report include any establishment(s) whose primary function is to provide support activities or services exclusively for other establishments of your company?

(1) ☐ No (2) ☐ Yes

If "yes," indicate the primary type of service or support provided (check as many as apply).

(1) ☐ Central administrative office
(2) ☐ Research, development, or testing
(3) ☐ Storage (warehouse)
(4) ☐ Other – Specify_____

V. NATURE OF BUSINESS FOR 1977

A. Indicate the general type of activity performed during 1977 by the establishment(s) included in this report i.e., manufacturing, wholesale trade, retail trade, construction, services, finance, etc.

B. Enter in order of importance the principal products manufactured, lines of trade, specific services, or other description of specific activities for 1977. For each entry, also include the approximate percent of total 1977 annual value of production, sales or receipts.

(1) _____ _____ %
(2) _____ _____ %
(3) _____ _____ %
(4) _____ _____ %

VI. RECORDABLE INJURIES AND ILLNESSES

Did you have any recordable injuries or illnesses during calendar year 1977?

(Check one)

(1) ☐ No – complete Section VII and Section IX
(2) ☐ Yes – complete Sections VII, VIII and IX.

VII. SUPPLEMENTARY DATA ON JOB SAFETY AND HEALTH

A. If your establishment(s) had either a Federal or State OSHA compliance inspection during calendar year 1977, please enter the month of the first inspection. _____ ☐

(Leave this box blank)

B. (a) Do you provide medical examinations for your employees?

(1) ☐ No (2) ☐ Yes

(b) If yes, indicate the type of medical examinations provided any of your employees. (Check as many as apply)

(1) ☐ Pre-placement examinations of new employees
(2) ☐ Periodic general medical examinations
(3) ☐ Periodic medical surveillance examinations
(4) ☐ Examination of employees returning to work after a lost time job related injury or illness
(5) ☐ Examination of employees upon termination of employment
(6) ☐ Other (specify)_____

C. Do you have an established safety and health training program? (Check as many as apply)

(1) ☐ No
(2) ☐ Yes–training for new employees
(3) ☐ Yes–training sessions for employees exposed to toxic substances which exceed prescribed action levels
(4) ☐ Yes–scheduled employee meetings, quarterly or more often
(5) ☐ Yes–informal, nonscheduled training by supervisors
(6) ☐ Yes–Other (specify)_____

D. Enter the number of lost workday cases (**not** the number of lost workdays) in your establishment(s) in 1977 which had 15 or more workdays away from work. (Refer to column 9a of the log, OSHA No. 100)

☐

VIII. INJURY AND ILLNESS SUMMARY (covering calendar 1977)

INSTRUCTIONS:
- This section may be completed by copying data from OSHA Form No. 102 "Summary, Occupational Injuries and Illnesses" or by Summarizing the Data from OSHA Form No. 100, "Log of Occupational Injuries and Illnesses".
- Leave Section VIII blank if there were no recordable injuries or illnesses during 1977.
- Code 30 – Add all Occupational Illnesses (Code 21+22+23+24+25+26+29) and enter on this line for each column (1) through (8).
- Code 31 – Add total Occupational Injuries (Code 10) and total Occupational Illnesses (Code 30) and enter on this line for each column (1) through (8).
- Make sure the entries in column (1) = the sum of the entries in columns (2), (3), and (7).
- PLEASE NOTE THAT FIRST AID, EVEN WHEN ADMINISTERED BY A DOCTOR OR NURSE, IS NOT RECORDABLE.

INSTRUCTIONS FOR COMPLETING FORM OSHA NO. 103

ANNUAL OCCUPATIONAL INJURIES AND ILLNESSES SURVEY

(covering calendar year 1977)

SURVEY REPORTING REGULATIONS

Title 29, Part 1904.20-22 of the Code of Federal Regulations requires that: each employer shall return the completed survey form, OSHA No. 103, within 3 weeks of receipt in accordance with the instructions shown below.
FAILURE TO COMPLY WITH THE REPORTING REQUIREMENTS MAY RESULT IN THE ISSUANCE OF CITATIONS AND ASSESSMENTS OF PENALTIES.

Change of Ownership – When there has been a change of ownership during the report period, only the records of the current owner are to be entered in the report. Explain fully under "Comments."

Partial-Year Reporting – For establishments which were not in existence for the entire report year, the report should cover the portion of the period during which the establishment(s) was in existence. Explain fully under "Comments."

SECTION I – ESTABLISHMENTS INCLUDED IN THIS REPORT

This report should include only those establishments located in, or identified by, the Report Location or Identification designation which appears below your mailing address. This designation may be a geographical area, usually a county or city, or it could be a brief description of your operation within a geographical area. If you have any question concerning the coverage of this report, please contact the agency identified on the OSHA No. 103 report form. Enter in Section I the number of establishments (as defined below) included in this report.

DEFINITION OF ESTABLISHMENT

An **ESTABLISHMENT** is defined as – a single physical location where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, restaurant, movie theater, farm, ranch, bank, sales office, warehouse, or central administrative office.)

For firms engaged in activities such as construction, transportation, communication, and electric, gas and sanitary services, which may be physically dispersed, reports should cover the place to which employees normally report each day.

Reports for personnel who do not primarily report or work at a single establishment, such as traveling salesmen, technicians, engineers, etc., should cover the location from which they are paid or the base from which personnel operate to carry out their activities.

SECTION II – ANNUAL AVERAGE EMPLOYMENT IN 1977

Enter in Section II the **average** of full and part-time employees you had during calendar year 1977 in the establishment(s) included in this report. Count all classes of employees, including seasonal, temporary, administrative, supervisory, clerical, professional, technical, sales, delivery, installation, construction, and service personnel, as well as operating and related workers.

Annual Average employment should be computed by Summing the employment from all pay periods during 1977 and then dividing that sum by the total number of such pay periods throughout the entire year, including periods with no employment. For example, if you had the following monthly employment – Jan.-10; Feb.-10; Mar.-10; Apr.-5; May-5; June-5; July-5; Aug.-0; Sept.-0; Oct.-0; Nov.-5; Dec.-5 – you would sum the number of employees for each monthly pay period (in this case, 60) and then divide that total by 12 (the number of pay periods during the year) to derive an annual average employment of 5.

SECTION III – TOTAL HOURS WORKED IN 1977

Enter in Section III the **total** number of hours actually **worked** by all classes of employees during 1977. Be sure to include **ONLY** time on duty. DO NOT include any non-work time even though paid, such as vacations, sick leave, holidays, etc. The hours worked figure should be obtained from payroll or other time records wherever possible; if **hours worked** are not maintained separately from **hours paid**, please enter your best estimate. If actual hours worked are not available for employees paid on commission, salary, by the mile, etc., hours worked may be estimated on the basis of scheduled hours or 8 hours per workday. (Example – If a group of 10 salaried employees worked an average of 8 hours per day, 5 days a week, for 50 weeks of the report period, the total hours worked for this group would be 10 x 8 x 5 x 50–20,000 hours for the report period.)

SECTION IV – SUPPORT ACTIVITIES PERFORMED FOR OTHER ESTABLISHMENTS OF YOUR COMPANY

It is necessary to know whether this report includes any establishment(s) whose **primary** function is to provide supporting **services** to other establishments of **your** company. The more important examples include central administrative (headquarters or district) offices; research, development or testing facilities; and storage (warehouses).

Answer "No" if a) services are not the primary function of any establishment(s) included in this report or b) if services are provided but only on a **contract or fee** basis for the general public or for other business firms.

Answer "Yes" **only** if supporting services are provided to other establishments of **your** company. Also, indicate the primary type of service or support provided by checking as many boxes as apply. For example, if one separate establishment is a central administrative office and another is a warehouse, check both (1) and (3). If several supporting services are performed in one establishment at a single location, check the one box which best describes the primary activity.

SECTION V – NATURE OF BUSINESS IN 1977

In order to assign the appropriate nature of business code, we must have information about the specific economic activity carried on by the establishment(s) included in your report during calendar year 1977. NOTE: If more than one establishment is included (as indicated in Section I), information in Section V should reflect the combined activities of all such establishments. One code will be assigned which best indicates the nature of business of the group of establishments as a whole.

Part A: General Activity – Enter the principal activity during 1977 in general terms such as manufacturing, construction, trade, finance, services, etc.

Part B: Specific Activity – List in order of importance the specific products, lines of trade, types of services, or other economic activities. Provide as much detail as possible. Opposite each entry, please enter the approximate percentage of 1977 annual dollar value of production, sales receipts, etc., as appropriate. Reliable estimates are acceptable.

SECTION VI – RECORDABLE INJURIES AND ILLNESSES

Check the appropriate box. If you checked "Yes," complete the remainder of the questionnaire. If you checked "No" complete Section VII and Section IX.

SECTION VII – SUPPLEMENTARY DATA ON JOB SAFETY AND HEALTH

PART A: Enter the number corresponding to the first month in 1977 in which your establishment(s) had an OSHA compliance inspection. For example, if the inspection occurred in March, enter "03". If the inspection occurred in November, enter "11", etc. Include inspections under the Federal or State equivalents of the Occupational Safety and Health Act by Federal or State inspectors and other inspections which may result in penalties for violations of safety standards. Do not include inspections limited to elevators or boilers or those which are consultative in nature.

PART B: Periodic general medical examinations – an examination administered by a doctor, or registered professional personnel under the standing orders of a doctor, in which medical opinions or conclusions are drawn.

Periodic medical surveillance examinations – periodic screening of employees who are exposed to toxic substances, hazardous materials, or injurious forces (e.g., noise, radiation, etc.).

SECTION VIII – INJURY AND ILLNESS SUMMARY

This section can be completed quickly and easily by copying the data already entered on your OSHA Form No. 102 "Summary of Occupational Injuries and Illnesses" for 1977 or by summarizing the data from your OSHA Form No. 100 "Log of Occupational Injuries and Illnesses".

NOTE: If this report includes more than one establishment, the separate OSHA No. 102 summaries for each must be added and the sums entered in Section VIII. However, you should first make sure that each OSHA No. 102 form has been correctly prepared. The OSHA No. 102 form is the summary of cases which have been entered on the "Log of Occupational Injuries and Illnesses" (OSHA No. 100) during calendar year 1977. Please review the Log to make sure that all entries are correct and complete. Each case should be included in only one of the three types: Fatalities (Log column 8); Lost Workday Case (Log column 9); or Nonfatal cases Without Lost Workdays (Log column 10). The Summary (OSHA No. 102) should have been completed by summarizing, separately, occupational injuries (code 10) and the seven categories of occupational illnesses (code 21 through 29) according to instructions on the back of the summary form.

Please remember that, if an employee's loss of workdays is still continuing at the time the summary is completed, you should estimate the number of future workdays he will lose and add this estimate to the actual workdays already lost.

NOTE: All injuries which, in your judgment, required only **First Aid Treatment**, even when administered by a Doctor or Nurse, should **not** be included on this report. First Aid Treatment is defined as one-time treatment and subsequent observation of minor scratches, cuts, burns, splinters, etc.

SECTION IX

Please complete all parts, including telephone number. Then return the OSHA No. 103 form (but NOT your file copy) in the self-addressed envelope.

PLEASE READ INSTRUCTIONS

February 11, 1977

Dear Employer:

The Occupational Safety and Health Act of 1970 requires the U. S. Secretary of Labor to collect, compile and analyze statistics on occupational injuries and illnesses. The Bureau of Labor, Maine Department of Manpower Affairs, conducts this survey to collect and compile these data for the State of Maine. This is a Federal-State cooperative program.

You have been selected to participate in the nationwide Occupational Injuries and Illnesses Survey for 1976. Although establishments are chosen for this survey on a sample basis, certain establishments may be included every year because of their importance to the statistics for their industry. Under the Occupational Safety and Health Act, your report is mandatory.

The following items are enclosed for your use:

(1) Instructions for completing the form;

(2) Form OSHA 103 and a copy for your files;

(3) An addressed return envelope.

Please complete OSHA form 103 and return the copy with the identification label attached, within three weeks in the envelope provided.

If you have any questions about this survey, please contact Mr. Brian Houston of this office (telephone No. 289-3331).

Thank you for your cooperation.

Very truly yours,

Harold S. Noddin
Bureau Director
